## **Full Building Water Shut Off**

**Tuesday March 26, 2019 8:30 am – 6:30 pm**

During this time, the hot & cold water will be shut off for the entire building.

*The shut down is required to deal with active leaks only.*

### **DO NOT TURN ON YOUR WATER AT ANY TIME DURING THE SCHEDULED WORK**

This will avoid any flooding potential when the water is turned back on. Any unit found responsible for causing flooding/water damage as a result of negligence during the water shut off, will be held liable for all repairs.

You can test for water in your home after 6:30pm. We will not be sending out a separate notice to you in this regard. Open tap slowly, as there will likely be air in the lines. You may also see some sediment when first in use, this is normal and should clear.

Thankyou in advance for your cooperation,

Gateway South Centre Management
