## **FULL BUILDING WATER SHUT OFF & 24hR Notice for Specific Unit Access**

**WEDNESDAY JULY 24, 2019**

**FROM 8:00AM UNTIL 5:00PM**

CAON will have 5 techs on site Wednesday July 24 for a full building shutdown.

During this shutdown we will be conducting the following action items:

1. Test the 3-building zone water shut offs valves.
  - a. To confirm Full Building Shutdowns would no longer be required for area specific plumbing repairs.
2. Replace the hot/cold riser valves for 205, 615 and 607 risers.
  - a. To further limit the number of Units affected- for plumbing related repairs.
  - b. There are over 100+ of these riser valves; and the goal is to get ALL properly functioning
3. Replace Unit isolation valves for Units:

1205	1615	1607
2205*	2615	2607
3205	3615*	3607
	5615	4607*
	6615	6607

Units listed need to be home this day or drop a key off or smart lock code to the site office starting today during normal Office hours BUT, no later than Tuesday July 23 at 4:00pm.

This is a formal notice for Unit access, so if you fail to take the noted action; a locksmith will be dispatched to gain trade access as a chargeback cost to you.

Everyone has been super cooperative with these needs this year, and we continue to appreciate your assistance.

**THANK YOU FOR YOUR COOPERATION.**
